ODORIZZI SOLUZIONI IN PIETRA  
relaunches on international set and markets,  
through innovation and new design challenges

## Opus Incertum

**Odorizzi Soluzioni in Pietra srl**, a trading company of Odorizzi Porfidi srl Group, leading enterprise in porphyry- and natural stones' world, for outside furnishing, having just overcome the crisis which affected its branch, and its own group, is now strongly relaunching all activities, firstly relying on its privately owned porphyry quarries Delgorsa® and Camparta®.

To designers, which Odorizzi has been cooperating for so many years with, offering a variety of its own stone solutions, such as to qualified retailers and to national and worldwide leading building companies, Odorizzi Soluzioni in pietra dedicated a new products' line: **OPUS INCERTUM**, cladding combinations realized with Camparta® porphyry – worked upon reduced thickness – and conceived for contemporary building branch, whose goal is blending innovation and aesthetic, with real stone. It counts 9 new models, introduced by the attached sheet. They all were imagined, developed and manufactured by recalling wall-cladding, belonging to Italian tradition, and they comprehend both corner and capping solutions. präsentiert. Sie sind nach der Linienführung des Designs der Wandverkleidungen der italienischen Tradition entwickelt worden und enthalten Ecken und Abdeckungen.

## Prada Foundation in Milan

Inside "quality works" department, **Odorizzi Soluzioni in Pietra srl** was honoured with contributing to the realization of **Prada Foundation** seat in Milan. Prada indeed, aimed – with the occasion of EXPO exhibition – to refurbish the remarkable area of an ancient distillery in Milan, entrusting OMA and Rem Koolhaas with designing phase, for this important project, carried out by "Colombo Spa" building enterprise.

This was a notable challenge for our company, which succeeded in delivering and installing about 3.200 m<sup>2</sup> of Delgorsa® cobbles – type 8/10cm – laid in straight rows technique, on a Splitflex base, sealed through Montorfano granite and innovative Flexyfuga. Through this relevant job, presented in the attached sheet, ODORIZZI pushes forward with its tradition in the most significant natural stone design challenges, ever realized.
